2/28

1. Letters have been received by a scientist in Hanover from two German fellow-scientists who are now in Belgrade.
 - a. The first, received in April 1949, was written by Dr. Meischeider, a soil expert who was formerly affiliated with the Deutsche Gesellschaft für Bodenforschung, Berlin. He expressed satisfaction about his conditions and work which consists of soil analysis for large construction projects.
 - b. The second, received in May 1949, was written by Dr. Wiechert, a micro-paleontologist who was formerly affiliated with the Reichsanstalt für Bodenforschung in Berlin. Wiechert also seemed satisfied with his working conditions in Yugoslavia. He stated that a large institute in Belgrade and numerous assistants had been placed at his disposal for his work, which consists of micro-paleontological research connected with oil drilling.
